

Roles & Permissions Matrix (IIBA / BABOK-style)

Project: Retail Operations Backoffice (Hệ thống quản lý bán hàng) — Multi-branch (nhiều chi nhánh)

Source docs: UC Descriptions (DOCX, Vietnamese — “VI source”) + module diagrams (UC / Sequence / Activity)

Version: 0.1 (English-first)

Owner: Business Analyst

Date: 2026-01-19

1) Purpose

Define a clear permissions model by role to support:

- Security (least privilege)
- Governance (approval rights)
- Testability (UAT and controls)

2) Roles

- ****CA**** = Cashier (Nhân viên bán hàng)
- ****INV**** = Inventory staff (Nhân viên kho)
- ****WH**** = Warehouse staff (Thủ kho)
- ****BM**** = Branch manager (Quản lý chi nhánh)
- ****CB**** = Cashbook clerk (Sổ quỹ)
- ****ADM**** = System admin (Quản trị hệ thống)
- ****OPS**** = HQ operations (Quản lý vận hành)

Permission levels:

- View = read-only
- Create/Update = can create or edit records

- Approve = can approve/override
- Admin = can configure master data / system settings
